Hard Skill

- **Java Technologies:** Core Java, Java 8, JDBC, Servlets and JSP
- **Frameworks:** Spring MVC, Spring Boot
- **ORM Frameworks:** Hibernate
- **Build Tool:** Maven
- **Programming Languages:** Java
- **Scripting languages:** JavaScript
- **Web Services:** SOAP and REST
- **Web Server:** Apache Tomcat 8 & 9
- **Databases:** Oracle, MySQL, MS SQL Server
- **IDE:** Eclipse and NetBeans
- **Tools:** Oracle SQL Developer, Git, Log4j

Soft Skill

- Quick Learner
- Decision making
- Good Communication Skills

Education Background

- MVGR College of Engineering
Btech
Completed in 2020

About Me

Experienced Java developer with 2.5+ years of hands-on experience in designing, developing, testing, and maintaining complex web-based applications. Proficient in Java, J2EE, Spring Framework, Hibernate, and SQL. Skilled in developing RESTful web services, MVC architecture, and working with various development tools such as Eclipse, NetBeans, and STS. Strong problem-solving skills, ability to work collaboratively in a team environment, and excellent communication skills. Always eager to learn and stay updated with the latest technologies and industry trends.

Professional Experience

Quest Software | Software Dev Associate Engineer (R&D)

2021, October – Present

Product : Erwin Data Intelligence Suite

Environment : Java, Spring boot, Hibernate, JavaScript, jQuery, MS SQL Server, REST, Tomcat, Maven

Description :

- Working as a Software engineer and working on various modules of the Erwin Data Intelligence Suite to perform various data management tasks.
- Erwin DI Suite has several modules and i worked on the below modules :
Mapping Manager : To create and manage data mappings between different data sources. It also provides data lineage and impact analysis capabilities.
Metadata Manager : To manage and govern metadata. It provides a centralized repository for storing metadata from different data sources.
Automation Framework : This helps automate data management tasks. It provides a scripting language & API for automating data management tasks.
- Performing product enhancement activities by developing new features in the existing product.
- Proficiency in using RESTful APIs and web services to integrate Erwin Data Intelligence Tool with other applications.
- Developed custom Smart Connectors which are capable of integrating with other technologies to forward engineer or reverse engineer sdk's and automate the process.
- Experience in building scalable, high-performance applications using Java and related technologies such as Spring and Hibernate.
- Knowledge of data integration concepts and experience with ETL (Extract, Transform, Load) tools such as Talend, DataStage and Fivetran(ELT).
- Strong debugging and troubleshooting skills, with a focus on identifying and resolving issues in a timely and efficient manner.
